

Re-/Setting Permissions

Adding a Modul Administrator to a Modul

To enable a User to change a Modul (edit it, add chapters, lectures, files etc.) he has to be the Modul Administrator for this Modul.

Go to the Memberships page and click on Available Communities. Search for the Module name in the list or use the search box.

Edit Community Roles for User: Electures Portal Admin

☐	Name ▼	Type	Description
 ☐	Community Administrator	Community	Community Administrators are super users of their community but cannot make other users into Community Administrators.
 ☒	Community Member	Community	All users who belong to a community have this role within that community.
 ☒	Community Owner	Community	Community Owners are super users of their community and can assign community roles to users.
 ☐	Modul Administrator	Community	Modul Administrators are users who are allowed to edit the contents of their modules.

Showing 4 results.

Click on the desired User Role (Modul Administrator or Community Owner). You should do this for both roles (Modul Administrator and Community Owner). The Modul Administrator role is needed to change the contents of a Modul. The Community Owner Role is needed to accept membership requests for this group.
