

A0001: First Steps for Users

Navigating through the Portal

The main view is called „ElecturesLibrary“ and here you're able to select a course (Modul) you are interested in. It is possible to sort the list by clicking on underlined table headers (e.g. title).

The screenshot shows the 'Electures-Portal' interface for Albert-Ludwigs-Universität Freiburg. It features a navigation bar with 'Welcome', 'Wiki', and 'Info' buttons. The main content area is titled 'ELECTURES LIBRARY' and contains a message: 'The Modul list is filtered because you do not have the necessary permissions.' Below this, it states '310 items found, displaying 1 to 200.' A table lists courses with columns for 'RSS', 'Title', 'Semester', 'Chair', 'Institute', and 'Lecturers'. Two entries for 'Advanced AI Techniques' are visible, one for 'WS 2005' and one for 'WS 2004'. To the right, there is a 'SIGN IN' section with fields for 'Screen Name' (containing 'ww9') and 'Password', a 'Remember Me' checkbox, and a 'Sign In' button. At the bottom of the sign-in section are links for 'Create Account' and 'Forgot Password'.

Main view of the Electures Portal.

Clicking on a title in the first column takes you on a second page which is divided in the „ModulNavigation“ portlet (left) and the „ModulDetail“ portlet (right). The left view shows you the whole structure of the selected Modul. Clicking a chapter/sub-chapter refreshes the „ModulDetail“ where you get a list of all the Electures related to the selected chapter. ModulDetail always shows all Electures belonging to the current chapter and all of its subchapters. To only display the Electures of a certain subchapter click on the related entry in ModulNavigation.

Clicking on the „Welcome“ button  always takes you to the ElecturesLibrary.

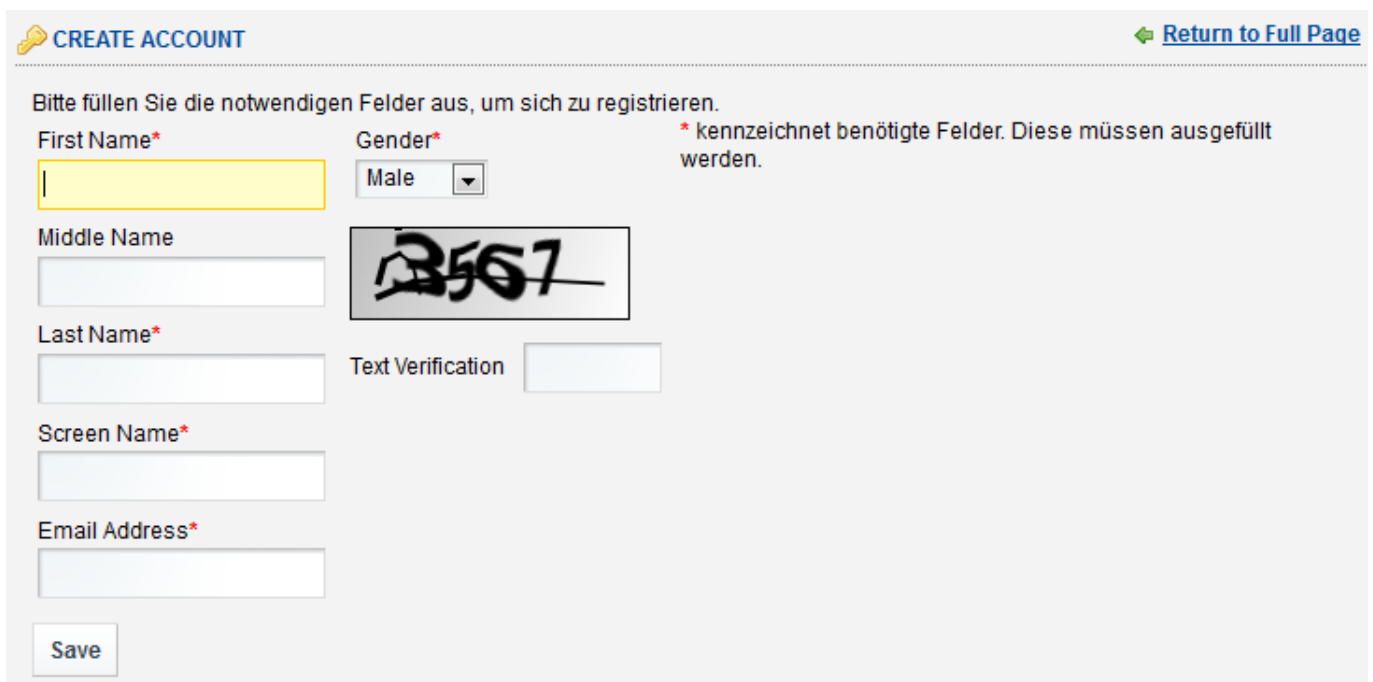

Applying for a User-Account

First of all, if you already have an Account at the University (i.e. from the local computing centre (RZ-Account) or the Faculty of applied sciences (FAW-Account)) try to login with this account. It is advised to use the account from the local computing centre whenever possible. Using the FAW-Account instead of the account from the local computing centre as a student will result in less functionality. Logging in with an FAW Account will only be automatically possible if you can login on login.informatik.uni-freiburg.de via ssh with your useraccount. (This should be possible at least for all students of the FAW. If you can't login on this machine you can ask your local system administrator for access or simply register for a normal useraccount on the Electures-Portal.) In this case your password will NOT be stored in the portal, since we rely on the universities external systems to perform authentication. Your password will never be sent unsecured over the network.

In case of an RZ-Account you will not need to enter any additional data, as your account will be automatically available in the portal.

In case of an FAW-Account you will need to enter your name to proceed. Your E-Mail adress will automatically be set to accountname@informatik.uni-freiburg.de.

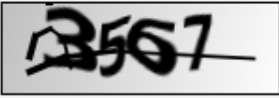

Only if you **don't have any of these accounts** you should create a pure Electures-Portal-Account. Creating an account is quit easy. On the main page near the login you'll find a link  [Create Account](#). Follow it and on the next page you're able to submit your name, password and email address. Fields with an asterisk (*) are required. The Figure below shows the form for this procedure.

CREATE ACCOUNT [Return to Full Page](#)

Bitte füllen Sie die notwendigen Felder aus, um sich zu registrieren.

First Name* Gender* * kennzeichnet benötigte Felder. Diese müssen ausgefüllt werden.

Middle Name 

Last Name* Text Verification

Screen Name*

Email Address*
